ADDENDUM 1 **RFP #25-006 Internet and Wide Area Network (WAN) Services** **for Chattahoochee Valley Libraries**

January 9, 2025

Dear Vendors,

Important information:

The due date for RFP 25-006 Internet and Wide Area Network (WAN) Services for Chattahoochee Valley Libraries has been extended. **The due date is February 14, 2025 at 10:00 AM EST.**

The following questions were received by the Purchasing Department for RFP #25-006 Internet and Wide Area Network (WAN) Services for Chattahoochee Valley Libraries:

1. Is Chattahoochee Valley Libraries looking for a layer-2 handoff to existing customer-owned equipment at the remote sites, or will we need to provide managed edge devices for each location? If there's any interest in seeing multiple configurations (e.g., with and without edge devices at the "Z" sites, or an SD-WAN solution), we can provide those options, too.

Answer: Managed edge devices (layer 3 routers) at each location, e.g. lit fiber

2. There is a lot of language in the RFP referring to E-Rate, but I'm not aware of a 470 being posted for this solution. Assuming that I haven't just missed the posting, could you please help me understand the role that E-Rate will play in this RFP? That is to say, will this ultimately be requested as both Cat 1 and 2; or are there certain components that will be funded via E-Rate, while the rest will be paid solely by the CVL; or are the E-Rate references just artifacts from a previous RFP of some sort? Any clarity here would be helpful.

1. **Answer:** 470 Application Nickname "FY25 C1 CVL Internet and Fiber WAN, RFP for 2 year contract w/ optional 1 year ext." Application Number 250011153; Funding Year 2025; Status Certified
